

Acknowledgements

The development of the *North Myrtle Beach Transportation Plan* represented a collaborative effort between local residents, numerous stakeholders, the Advisory Committee, Horry County, North Myrtle Beach, and the South Carolina Department of Transportation.

Advisory Committee

Jennifer Kiper – North Myrtle Beach	Micheal Bethea – SCDOT
Dan Hatley – North Myrtle Beach	Myers Rollins – Coast RTA
Jim Wood – North Myrtle Beach	George Osborne – Coast RTA
Kevin Blayton – North Myrtle Beach	Marc Jordan – Chamber of Commerce
David Schwerd – Horry County	Walt Muller – Tidewater Homeowner
Andrew Markunas – Horry County	Dave Williams – Tidewater Homeowner
Mark Hoeweler – Waccamaw Regional COG	Bill McCriskin – Barefoot Homeowner
Chris Clark – Waccamaw Regional COG	Pat Leibedz – Horry County Resident

Kimley-Horn and Associates, Inc.

Brett Wood	Jonathan Whitehurst
Michael Rutkowski	Cole Dagerhardt
Julie Young	Matt Noonkester
Camille Barchers	

A special thanks to the local community for providing the foundation for this plan

Table of Contents

Chapter 1 — Project Background

Our Heritage	1-1
Project Overview	1-2
Planning Process	1-3
Public Outreach	1-3
Previous Planning Efforts	1-7
Vision and Objectives	1-8
Plan Organization	1-9

Chapter 2 — Existing Conditions

Planning Guidelines	2-1
Natural, Social, and Environmental Resources	2-2
Social and Environmental Features	2-2
Environmental Justice	2-4
Existing Roadway Characteristics	2-9
Corridors and Activity Centers	2-9
Functional Classification	2-10
Corridors Operations	2-12
Traffic Safety and Crash History	2-16
Potential and Committed Projects	2-18
Existing Multimodal Network	2-19
Planned Development	2-19

Chapter 3 — Transportation Best Practices Toolbox

Access Management	3-1
Symptoms and Benefits of Access Management.....	3-1
Access Management Strategy Toolkit	3-2
Access Management Solutions	3-5
Collector Street Planning.....	3-6
Policy Considerations	3-6
Future Collector Street Network.....	3-6
Complete Streets.....	3-7
Implementing Complete Streets.....	3-7
Street Realms.....	3-8
Bicycle and Pedestrian Planning.....	3-12
Users and Facilities	3-12
Programs and Policies	3-13
Bicycle and Pedestrian Element	3-13
Interchange Design Toolbox	3-15
Typical Interchange Designs	3-15
Design Standards.....	3-16
Study Area Interchange Modifications	3-16

Chapter 4 — Multimodal Recommendations

Systems Recommendations	4-1
No Build (Do Nothing) Conditions	4-1
Recommendations	4-1
Corridor Recommendations.....	4-3
Spot Recommendations.....	4-9
Collector Street Recommendations	4-13
Build (Systems Recommendations) Conditions.....	4-13
Strategic Corridors.....	4-15
Bicycle and Pedestrian Element.....	4-23
Transit Element	4-25
Complete Street Concepts	4-27

Chapter 5 — Land Use Considerations

Land Use and Urban Form	5-1
Urban Form and Travel Behavior	5-2
Reorganizing Urban Form — The 4D Analysis	5-2
Focus Area Studies	5-5
Planning Process	5-6
Focus Area 1 — Little River Neck Road.....	5-7
Focus Area 2 — Intracoastal Residential	5-12
Focus Area 3 — Main Street Corridor	5-17
Scenario Planning.....	5-23
CommunityViz Software	5-23
Development Scenarios.....	5-23
Scenario Planning Results.....	5-25
Policy & Guidelines Toolbox.....	5-26
Local Strategies.....	5-28

Chapter 6 — Implementation Plan

Introduction.....	6-1
Funding Opportunities	6-1
Local/State/Federal Initiatives	6-1
Public/Private Initiatives.....	6-3
Action Plan	6-3
Policy Measures.....	6-4
Highway Improvements.....	6-4
Collector Streets.....	6-5
Sidewalks, Bikeways, and Greenways	6-5
Transit	6-6
Projects for Further Study	6-6
Conclusion.....	6-6
Action Plan Matrix	6-7
