

## Salt Dough Recipe

2 c flour

1 c salt

2 tbs. vegetable oil

$\frac{3}{4}$  c to 1 c water

Food coloring optional

1. Combine flour and salt in a large bowl
2. Add oil
3. Slowly add water and stir until a clay-like consistency
4. If you want different colors, separate clay and add food coloring. Coloring might stain your hands while working with the clay.

Create desired shapes out of clay. Product can air dry for 48-72 hours or can be baked in an oven at 250°F for about an hour. The length of time will depend on the thickness of your clay. The goal is to bake long enough for the clay to harden, but not burn.
